

***Lessons learned from RECORDIT
and issues for further research
and debate***

Andrea Ricci

Research

- ✍ **Enhance and consolidate the cost database, through:**
 - ✍ **additional case studies (corridors)**
 - ✍ **validation with users, shippers, operators, etc.**

- ✍ **Reduce uncertainties associated to:**
 - ✍ **sources**
 - ✍ **valuation methodologies**

- ✍ **Carry out a wider study of variability, and interpretation in view of transferability and generalisation**

- ✍ **Enhance the potential use of DSS through link (integration?) with**
 - ✍ **transport models**
 - ✍ **demand models**

Policy

- ✍ **Carry out consistent and systematic simulation of current policies:**
- ✍ **Inform new policy formulation through**
 - ✍ **scenario building (policy packages)**
 - ✍ **sensitivity analyses**
- ✍ **Develop a policy modelling framework**
- ✍ **Transfer to policy makers and direct support in the use of the RECORDIT database and DSS**

Dissemination

- ✍ **Project Deliverables**
- ✍ **Project Web Site (www.recordit.org)**
- ✍ **Participation to Thematic Networks (pricing, SEA)**
- ✍ **Input to other projects and studies (UNITE, national initiatives.)**
- ✍ **Enhancement of the RECORDIT network of contacts (target users)**
